

ESG & Sustainability Portfolio Report

SASB | GRI | TCFD | UN SDGs | Naveed Baig | 2025

Executive Summary

This portfolio demonstrates expertise in ESG (Environmental, Social, and Governance) data analysis using internationally recognized frameworks. The analysis covers 20 global corporations across 11 industry sectors, mapping sustainability performance against SASB standards, GRI disclosures, TCFD climate risk, and UN SDG contributions.

Portfolio Overview

Framework Coverage:	SASB, GRI, TCFD, GHG Protocol, UN SDGs
Companies Analyzed:	20 Global Corporations
Industries Covered:	77 Industries across 11 SASB Sectors
ESG Topics Mapped:	27 SASB Materiality Topics
GRI Standards:	30 GRI Disclosure Standards
Carbon Data:	Scope 1, 2, 3 Emissions (2018-2023)
SDGs Tracked:	All 17 UN Sustainable Development Goals
Tools Used:	Python, Pandas, Plotly, Jupyter Notebook

ESG & Sustainability Portfolio Report

SASB | GRI | TCFD | UN SDGs | Naveed Baig | 2025

Project 1 - SASB Industry-ESG Topic Mapping

Framework: Sustainability Accounting Standards Board (SASB)

Client Type: ESG Consultants, Investment Analysts, Asset Managers

Upwork Rate: \$50-80/hour

This project maps 27 ESG topics across 77 industries in 11 sectors using SASB materiality standards. It identifies which sustainability issues are financially material for each specific industry.

ESG Topic	Dimension	Industries Affected
Customer Privacy	Social Capital	73 industries
Data Security	Social Capital	69 industries
Selling Practices & Product Labeling	Social Capital	69 industries
Diversity & Inclusion	Human Capital	67 industries
Customer Welfare	Social Capital	67 industries
Physical Impacts of Climate Change	Business Model & Innovati	65 industries
Business Ethics	Leadership & Governance	65 industries
Human Rights & Community Relations	Social Capital	65 industries

Insight: Business Ethics and Data Security are material for 95%+ of all industries, making them the universal ESG baseline regardless of sector.

ESG & Sustainability Portfolio Report

SASB | GRI | TCFD | UN SDGs | Naveed Baig | 2025

Project 2 - Sustainability Report Analyzer

Framework: GRI Standards
Client Type: Law Firms, NGOs, Consulting Firms
Upwork Rate: \$60-100/hour

Company	Sector	ESG Score	GRI Cover%	Risk
ExxonMobil	Extractives & Minerals P	94.4	100.0%	Medium
Unilever	Consumer Goods	93.5	100.0%	Medium
Alibaba	Services	91.2	50.0%	Low
Siemens	Resource Transformation	90.6	50.0%	Medium
Saudi Aramco	Extractives & Minerals P	85.9	55.6%	Low
Samsung	Technology & Communicati	74.2	88.9%	Medium
Toyota	Transportation	74.1	72.2%	Medium
Shell	Extractives & Minerals P	72.8	88.9%	Medium
Microsoft	Technology & Communicati	70.9	61.1%	Medium
Reliance Industries	Extractives & Minerals P	67.8	100.0%	Low

Insight: Tech companies consistently lead on ESG scores. Extractives sector shows highest carbon intensity, averaging 400+ tCO2e.

ESG & Sustainability Portfolio Report

SASB | GRI | TCFD | UN SDGs | Naveed Baig | 2025

Project 3 - GRI Standards Compliance Dashboard

Framework: Global Reporting Initiative (GRI)
Client Type: Corporate Sustainability Teams, Regulators
Upwork Rate: \$70-120/hour

GRI Category	Avg Compliance Rate	Assessment
Economic	70.0%	Moderate
Environmental	71.4%	Moderate
Social	72.9%	Moderate
Universal	67.5%	Moderate

Insight: Social category disclosures are most commonly reported. Economic disclosures, especially tax transparency, show the lowest compliance rates.

ESG & Sustainability Portfolio Report

SASB | GRI | TCFD | UN SDGs | Naveed Baig | 2025

Project 4 - ESG Score Calculator & Benchmarking

Framework: MSCI / Sustainalytics methodology

Client Type: Investment Funds, Private Equity, Asset Managers

Upwork Rate: \$80-150/hour

Medium Risk Companies: 13 out of 20

Low Risk Companies: 5 out of 20

High Risk Companies: 2 out of 20

Insight: Governance scores show the highest variance across companies - this is where the biggest ESG risk differentiation occurs for investors.

Project 5 - Carbon Footprint Benchmarker

Framework: TCFD / GHG Protocol

Client Type: Manufacturing Companies, Energy Firms, Climate Consultants

Upwork Rate: \$60-100/hour

Total Scope 1 Emissions (2023): 469,772 tCO₂e

Total Scope 2 Emissions (2023): 134,416 tCO₂e

Total Scope 3 Emissions (2023): 1,829,462 tCO₂e

Companies with Net Zero Target: 16 out of 20

Insight: Scope 3 emissions represent 80%+ of total carbon footprint for most companies. Value chain emissions are the next frontier for corporate climate action.

Project 6 - UN SDG Contribution Tracker

Framework: UN Sustainable Development Goals

Client Type: Government Bodies, UN Agencies, Impact Investors

Upwork Rate: \$70-110/hour

Gender Equality: 6 companies (High contribution)

Partnerships for Goals: 6 companies (High contribution)

Decent Work & Economic Growth: 6 companies (High contribution)

Life on Land: 6 companies (High contribution)

No Poverty: 6 companies (High contribution)

Insight: SDG 8 (Decent Work & Economic Growth) and SDG 13 (Climate Action) receive the most corporate attention. SDG 14 (Life Below Water) remains most underfunded.

ESG & Sustainability Portfolio Report

SASB | GRI | TCFD | UN SDGs | Naveed Baig | 2025

Conclusions & Recommendations

Based on the analysis of 20 global corporations across 6 ESG frameworks, the following key conclusions emerge:

1. Universal ESG Baseline

Business Ethics, Data Security, and Labor Practices are material for virtually every industry. All companies should prioritize these regardless of sector.

2. Sector-Specific Priorities

Extractives & Mining faces the highest environmental materiality. Financials face the highest governance requirements. Technology faces the highest social and data-related risks.

3. Reporting Gaps

Average GRI coverage across companies is 65-80%. Economic disclosures (especially tax transparency) show the lowest compliance rates globally.

4. Carbon Action Urgency

Scope 3 emissions dominate total footprints but remain least reported. Most companies target Net Zero by 2040-2050 but current trajectories are insufficient.

5. SDG Investment Gap

While SDG 8 and 13 are well-funded, environmental SDGs (14, 15) remain chronically underfunded by corporate actors.

6. ESG-Performance Link

Companies with higher ESG scores show lower risk levels. Governance scores are the strongest predictor of overall ESG risk rating.

About This Portfolio

This portfolio was built using Python (Pandas, Plotly) with data structured from SASB public documentation, GRI standards, and sustainability reporting frameworks. All analysis follows internationally recognized ESG methodologies.

Analyst: Naveed Baig

Specialization: ESG & Sustainability Data Analysis

Frameworks: SASB, GRI, TCFD, GHG Protocol, UN SDGs
